## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-4, 6, 7, and 9-11 (renumbered 1-9) are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Tsihlas. As best depicted in Figures 1-3, Tsihlas is directed to a pneumatic tire construction comprising an annular object 40 (noise attenuating device) mounted on an inner surface of a tire tread portion. Furthermore, said object is described as having a varied cross-sectional area over the circumferential extent of the tire (due to the inclusion of rectangular ridges and rectangular gaps). Tsihlas describes a method of forming said object by machining or cutting out material where a rectangular gap is desired. Alternatively, Tsihlas suggests a molding technique to form said rectangular gaps. The claimed tire, however, requires the presence of "compressed portions" as a result of performing a compression step and such a technique is seen to result in a materially different article.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
